Calculating GST on Purchases

Name: _____ Date: _____

Remember: GST (Goods and Services Tax) in New Zealand is 15%. To calculate GST, multiply the price by 0.15. To find the total price including GST, add the GST amount to the original price.

Part A: Calculate the GST and Total Price

For each item below, calculate the GST amount and the total price including GST.

1. Basketball - $60.00

GST amount (15%): $_____

Total price including GST: $_____

2. School backpack - $40.00

GST amount (15%): $_____

Total price including GST: $_____

3. Board game - $80.00

GST amount (15%): $_____

Total price including GST: $_____

4. Running shoes - $120.00

GST amount (15%): $_____

Total price including GST: $_____

5. Bluetooth speaker - $90.00

GST amount (15%): $_____

Total price including GST: $_____

Part B: Word Problems

6. Sophie buys a desk lamp for $50.00. How much GST will she pay?

Answer: $_____

7. James purchases a cricket bat for $85.00 (before GST). What is the total price he pays including GST?

Answer: $_____

8. A tablet costs $200.00 before GST. Calculate both the GST amount and the final price including GST.

GST amount: $_____

Final price: $_____
