

Estimating and Checking Addition Answers

Name: _____

Date: _____

Instructions:

For each problem, first **estimate** the answer by rounding the numbers. Then calculate the **actual answer**. Finally, check if your estimate was reasonable.

Part A: Round to the nearest 10

1. $47 + 82$

Estimate: _____ + _____ = _____

Actual answer: _____

Is your estimate reasonable? _____

2. $134 + 68$

Estimate: _____ + _____ = _____

Actual answer: _____

Is your estimate reasonable? _____

3. $256 + 183$

Estimate: _____ + _____ = _____

Actual answer: _____

Is your estimate reasonable? _____

Part B: Round to the nearest 100

4. $347 + 482$

Estimate: _____ + _____ = _____

Actual answer: _____

Is your estimate reasonable? _____

5. $1,267 + 854$

Estimate: _____ + _____ = _____

Actual answer: _____

Is your estimate reasonable? _____

6. $2,438 + 1,691$

Estimate: _____ + _____ = _____

Actual answer: _____

Is your estimate reasonable? _____

Part C: Challenge - You choose!

Decide whether to round to the nearest 10 or 100 for each problem.

7. $3,456 + 2,178$

Estimate: _____ + _____ = _____

Actual answer: _____

8. $567 + 89 + 342$

Estimate: _____ + _____ + _____ = _____

Actual answer: _____
