Estimation and Division

Name: _____ Date: _____

Instructions: For each problem, first estimate the answer by rounding the numbers. Then solve the division problem accurately. Show your working.

1. 487 ÷ 6

Estimate (round to nearest 10 or 100): _____

Working:

_____

_____

Actual answer: _____

2. 823 ÷ 9

Estimate (round to nearest 10 or 100): _____

Working:

_____

_____

Actual answer: _____

3. 1,264 ÷ 4

Estimate (round to nearest 100): _____

Working:

_____

_____

Actual answer: _____

4. 2,156 ÷ 7

Estimate (round to nearest 100): _____

Working:

_____

_____

Actual answer: _____

5. 3,418 ÷ 8

Estimate (round to nearest 100 or 1000): _____

Working:

_____

_____

Actual answer: _____

Reflection:

How close were your estimates to the actual answers? _____
